

To Whom It May Concern:

We are pleased to write this letter of recommendation for CS Stucco and Plaster. In the fall of 2008, CS Stucco and Plaster removed our old EIFS siding and replaced it with a new three layer hard coat stucco system. We remained in our home while the work was being completed, and found this company and its employees to be professional and courteous.

The foreman was very knowledgeable and had a good overall understanding of construction. He and his crew were attentive to details and worked hard to make sure the job was completed in a timely manner. CS Stucco also helped plan for and prepare certain wall areas for the application of stone, insuring that the stone and stucco would be fully integrated.

CS Stucco kept a relatively clean job site and cleaned up after the work was completed. They used plenty of protection for the windows, roofs, landscaping and driveways. This made the clean-up much easier.

CS Stucco was extremely easy to work with. We felt we always had adequate supervision and oversight. They were fair with any change orders. When a decision had to be made, we felt that they provided the extra time to make sure that we were always educated on the options. They truly wanted us to be happy with the end result and we are! We love how the house looks!

Overall we had a great experience with CS Stucco and highly recommend this company as a stucco contractor. We would be pleased to provide a reference upon request.

Sincerely,

Homeowners in Bridgewater
